1 Overview

This application extends the presentation to show previous slide on the multiple displays.

2 Contents of the application package

1. multimonitor.exe - Application executable for powerpoint versions less than 2013.

2. multimonitorfor13.exe - Application executable for powerpoint versions 2013 and above.

3. Resolution_Configuration.txt -

   a) Display Resolution to be shown in extended displays in width and height in line number 2 and 3 respectively.

   b) Slideshow resolution - Provide resolution of Monitor which displays the slideshow in width and height in line number 5 and 6 resectively.

3 Setup Guidelines

1. Monitors should be aligned in same horizontal axis. Refer figure 1.

2. The first display should be the presenter display and the 2nd should be the slideshow. Displays 3 and 4 will show previous slides.

3. Setting up the monitors in powerpoint -

   a) Open Powerpoint.
   b) Go to SlideShow Tab.
   c) Set the slideshow monitor as monitor 2 (Refer Figure 1)
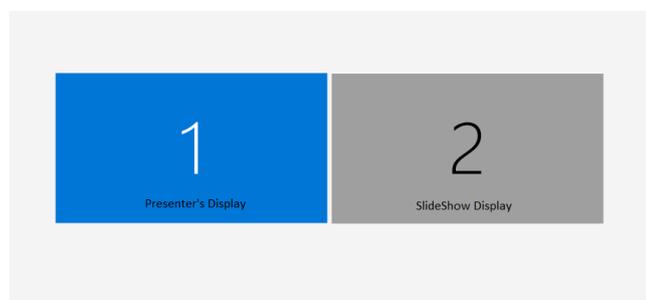

Figure 1

4 How To Run

1. Every time before starting the presentation, Double click on the multimonitor.exe executable file.

2. Press F5 to trigger the application.

3. For navigating to the next slide use space key only.

4. For navigating back to the previous slide use "V" alphabet key only.

5. Use Esc key for ending the script.
